

Copyright Q & As Tutorial Series Transcript

[Series Intro](#)

Hi, I'm Copyright Cate. Welcome to this tutorial series on Copyright Q&As. These tutorials aim to help you understand how copyright works.

Knowing your rights as a creator and how to use works created by others in copyright-compliant ways is important, as copyright is a matter of federal law.

The primary goal of the series is to help you understand how you can use copyrighted materials and create your own works within the provisions of Canadian copyright law. But because copyright involves a number of complex concepts, the series begins by exploring some questions about copyright's theoretical underpinnings.

Later tutorials take a look at more practical issues like the kinds of uses you can make of copyrighted materials without infringing copyright.

Each tutorial begins by stating what you will be able to do upon completing it. And at the end of each tutorial you will always see a list of sources you can consult for further information.

Thanks for viewing this tutorial in our Copyright Q&A series. You can check out the Sources used in this tutorial as well as Further Information if you'd like to find out more about copyright.
