

Physics & Astronomy Speaker Series 2017

Tuesdays & Thursdays, 1:40-2:55, C640

DATE	SPEAKER
January 19th	Geoff Sitwell University of Lethbridge Undergraduate Thesis Presentation <i>Spectral Analysis and Modeling of Select Massive Young Stellar Objects</i>
January 26th	Locke Spencer University of Lethbridge Department of Physics & Astronomy <i>Exploring the Far-Infrared Universe, with a side order of Raspberry Pi</i>
February 7 th	Dan Gale VP & CTO CMC Microsystems <i>Three orders of magnitude, what's the difference? Assisting creative and innovative pursuits at micro-and nano-scales (and a brief mention of a cathedral in relief)</i>
February 9th	Ian Veenendaal University of Lethbridge Comprehensive Exam Presentation <i>A rotary Fabry-Perot Spectrometer as a potential high resolution module for SPICA/SAFARI</i>
March 2nd	Chris O'Dea University of Manitoba Department of Physics & Astronomy PUPSS Talk <i>Black Holes vs Galaxies</i>
March 9th	Kent Peacock University of Lethbridge Department of Philosophy <i>EPR: The Paradox That Won't Go Away</i>
March 16th	Daya Gaur University of Lethbridge Department of Math & Computer Science <i>An Introduction to Quantum Computing</i>
March 23rd	Randy Lewis York University Department of Physics & Astronomy CAP Lecture Tour Speaker <i>Exotic Hadrons</i>
March 30th	Sasha Koustov University of Saskatchewan Department of Physics & Engineering Physics PUPSS Talk <i>Study of Aurora Borealis with the SuperDARN radars</i>
April 6th	Russell Mammei University of Winnipeg Department of Physics PUPSS Talk <i>What's So Cool About Ultracold Neutrons?</i>

EVERYONE IS WELCOME TO ATTEND
