Pacific Institute for the Mathematical Sciences

PIMS Distinguished Speakers Series

JAYADEV ATHREYA

Associate Professor of Mathematics
University of Washington
Director of Washington Experimental Lab
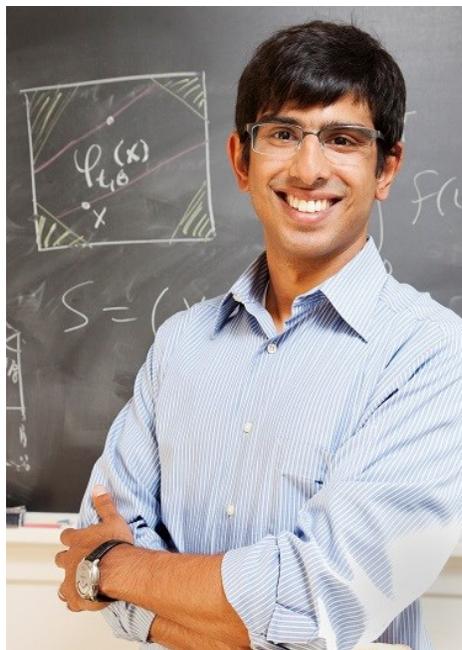

Title: What is an Experimental Mathematics Lab?

Abstract: We describe various models of creating communities of mathematical explorers, inspired by our work at Illinois and Washington, and earlier work at Maryland. We will outline how we think any Math department can be the center of a vibrant mathematical community.

About WXML: The Washington Experimental Mathematics Lab (WXML) is a group of mathematical explorers (faculty, students, and community members) that showcase mathematics as a creative discipline, via experimental, computational, and specially visual mathematics. "
