

Careers in Chemistry: Balzac Gas Plant

Presented by uLethbridge alumnus **Victor Januszewski (BASc, Chemistry '73)**

Our own uLethbridge alum, Victor Januszewski, was employed at the Balzac Gas Plant for 37 years and has amazing facts and information to share about his experience as a laboratory technician.

Some of the topics to be included are:

- Gas quality specification in pipelines
- Gas chromatography
- Processing of gas such as sulphur recovery unit, gas sweetening, dehydration and dew point control and liquefied petroleum gas production
- Water analysis parameters for release
- Our changing atmosphere
- Canadian Association of Petroleum Producers (CAPP) production data
- And everything in between!

Thursday, March 23, 2017

12:15 – 1:30 pm

University Hall D634

Everyone is welcome
