

10249 - Chem 2320 - History of Chemistry

Winter 2025

Monday, Tuesday & Thursday 3:00 - 3:50 PM (SA7202)

Did you know that many molecules changed the course of history, making the world we know today?

Join us on a journey that explores how that happened - from spices to fabrics to witchcraft to medicine.

Discover how chemistry changed the way we look at the world ***and resulted in great historical shifts.***

Prerequisites - Grade 12 chemistry

Completion of 10 University courses.

No University science required
