Saturdays, 9:30 – 11:30 am

\$130 for 8 sessions

A club to engage home school children in curriculum-based hands-on science activities, experiments, projects and games.

STEM Club offers participants a chance to experience amazing hands-on activities and experiments in a fun learning environment. This club will be youth driven, with topics chosen by participants.

Codergirl will introduce participants to computer science, technology, digital literacy and citizenship in a safe and friendly environment.

In Tech Maker club, students will build, design, create, program and DIY with all sorts of technology. We will delve into electronics, robotics, 3D printing with a focus on using and learning practical skills.

Do you like to draw? Tell stories? Be creative? Join our new C3 Club! This club focuses on comics, cartoons, and culture. Create your own stories and movies with emotion and personality, while making new friends and learning new skills!

In this club, participants will get to design, build, and program their own robots. From simple to complex technologies, we will delve into the wonderful world of electronic engineering and how it relates to our everyday life.
