

FACULTY OF ENVIRONMENTAL DESIGN

ARCHITECTURE | PLANNING | LANDSCAPE ARCHITECTURE

UNIVERSITY OF CALGARY

INFORMATION SESSION

DR. BRIAN R. SINCLAIR, FRAIC AIA

Monday October 26th – 3 pm – Room W850, Centre for the Arts, U of L

Faculty of Environmental Design (EVDS) at the University of Calgary offers exciting programs to prepare individuals for critical work in sustainable built and natural environments. Situated within one of the fastest growing cities in Canada, EVDS has long been dedicated to an interdisciplinary and innovative culture. Our combined commitment to both the environment and leading edge design makes for a stimulating learning and teaching setting. Students as well as faculty members are dedicated to seeking answers for more sustainable ways to inhabit our world – as creative and effective design collaborators and leaders.

The **Master of Architecture** (MArch) is a course-based graduate degree; a top-tier program in Canada, the MArch centres itself on the 'ecologies' of design. The **Master of Planning** (MPlan) is a newly accredited course-based professional program that is on the leading edge of practice. We have recently mounted the **Master of Landscape Architecture** (MLA) as the first graduate program in landscape architecture in Canada since 1980. These three professional, course-based programs complement our thesis-based **Master of Environmental Design** (MEDes) + **Doctor of Philosophy** (PhD) program making for a community of scholars who consider design & environmental directions from broad interdisciplinary perspectives.
