

What do patients have to do with research?

The Patient-Oriented Research Training Program explores what it means for research to be patient-oriented. Each month, **free introductory workshops** are available for anyone who wants to learn. Next session:

Being a Trailblazer in Patient-Oriented Research- Challenges and Rewards
Wednesday, November 30th, 2016 from 4:30-6:00pm

Guest Speaker:

Gail MacKean- Recently, Gail has joined the Alberta SPOR unit as Patient Lead of the Patient Engagement Platform. She is also a founding member of IMAGINE Citizens Collaborating for Health, an Alberta-based citizen-led initiative supported by the O'Brien Institute for Public Health at the University of Calgary. Gail has a PhD in Community Health Sciences (Health Services Research) from the University of Calgary. Her research interests include patient and family-centred healthcare, and citizen and patient participation in health systems.

Attend in-person at the University of Alberta, University of Calgary, or University of Lethbridge, or join us online, via Adobe Connect.

Go to <https://sportrainingprogram8.eventbrite.ca> for information on how to attend and to register for your free ticket.
