NVivo for Windows Workshop
for Students, Faculty, and Staff
March 13, 2018

What? NVivo (QSR International.com) is a popular qualitative data analysis software.

Who? This course is suitable for NVivo 10 and NVivo 11 users (Starter, Pro or Plus) with little or no experience.

What? This full-day hands-on workshop will walk you through the basics of NVivo and provide you with information and practice to get you started in your own project.

In this course we will:

- ✓ Present an overview of NVivo and learn the NVivo workspace
- ✓ Learn how to create a new project in NVivo using sample data
- ✓ Import and organize documents and other file formats (e.g., PDF, datasets)
- ✓ Create and learn how to manage coding structures, practice coding, and discover how coding can be displayed and exported
- ✓ Create memos, annotations and "see also links" as a means of reflecting on the data and analysis process
- ✓ Learn and practice query functions using the query wizard for commonly used queries
- ✓ Visualize the work by using comparison and explore diagrams and other NVivo visuals
- ✓ Discuss good housekeeping, tips for working in teams, learning resources, and other topics (as time permits and in consideration of participant interests)

About the Presenter: Laura Lagendyk, MSc

Laura Lagendyk, MSc, is an NVivo Certified Platinum trainer. Laura brings 15+ years' experience leading academic and applied health research and evaluation teams and projects. She has worked on quantitative, qualitative, and mixed methods projects in a wide variety of healthcare settings and topics. She has worked in academic and clinical settings, primary care, and healthcare operations.
