Job Posting Information

Term Posted	Spring
Job Title	Insect Pest Management Research Assistant
Duration	4 Months/Poss. Extension
Job Location	Lethbridge
Job Description	

This research position is an opportunity to work at one of the largest federal agricultural research facilities in Canada. We have over 40 research programs specializing in livestock, crop and land resource sciences. You would be working in insect pest management examining the effects of insects on oilseed and legume crops. Insects currently being studied include flea beetles (canola), cabbage seedpod weevils (canola), *Lygus* bugs (canola) and pea leaf weevils (faba beans). Your responsibilities could include assisting with insect identification and counts from field collected samples, preparation of plant samples for analysis, determination of pea leaf weevil super cooling points, maintenance of insect colonies, establishment of 2018 field sites, and unbiased data collection and entry. This term of employment would also include the possibility of summer employment depending on interests and aptitude of the successful applicant.
