Mathematics and Computer Science Seminar

is pleased to announce a presentation by

MICAH TIGLEY

Undergraduate Capstone Open Source Program

Wednesday – March 29, 2017

12:00 to 12:50 pm

D632

ABSTRACT:

Micah will be discussing her experience in the Undergraduate Capstone Open Source Program. She will be talking about how UCOSP is a good entry point into open-source software development for university students as well as why getting involved in open-source is an important skill to have. In particular, she will be outlining her experience working on Mozilla's Firefox Developer tools and the software engineering tools/practices she needed to employ with her team in order to become successful.

EVERYONE IS WELCOME!

What is UCOSP? Every Fall and Spring semester, this applied studies course is available to senior undergraduate students in Computer Science. UCOSP is about real distributed software development in a production environment.
