

DEPARTMENT OF GEOGRAPHY

FRIDAY AFTERNOON SEMINAR

*Data to Decision:
Environmental modelling and
community-based monitoring*

Dr. Scott Heckbert
Chief Environmental Scientist,
Alberta Energy Regulator

Friday, Sept 27
3:00-4:30PM
AH117

Everyone welcome!

This presentation will demonstrate applications in environmental modelling and community-based monitoring. The intention of the talk is to provide an overview of past and current work of the presenter, for the purposes of finding common points of interest with the Department of Geography. On the topic of environmental modelling, simulations of land use change and hydrology will be presented,

with a focus on the use of models as exploratory virtual labs with stakeholders using 3D technologies. On the topic of community-based monitoring, a current project will be presented with opportunities to explore department contributions.
