Lethbridge Number Theory and Combinatorics Seminar

Monday — September 16, 2019
Room: C630
Time: 12:00 to 12:50 p.m.

Gabriel Verret

University of Auckland
New Zealand

An update on the Polycirculant Conjecture

One version of the Polycirculant Conjecture is that every finite vertex-transitive digraph admits a non-trivial semiregular automorphism. I will give an overview of the status of this conjecture, as well as describe some recent progress with Michael Giudici, Ademir Hujdurovic and Istvan Kovacs.

EVERYONE IS WELCOME!
