♦Summer Institute (SI) is required in each year of the program.

♦The program is designed to allow students to continue working for the majority of the program. It is recommended that students be prepared to reduce their hours of work/other obligations if the demands of graduate studies warrant it. The final two terms of program include a practicum, impacting ability to work during those terms.

♦Practicum placements may require a vulnerable sector check, or similar.

♦Students completing a Project may require additional terms to complete program.
