Planning in Kindergarten is based on the Alberta Education Document Kindergarten Program Statement

The *Kindergarten Program Statement* (Alberta Education, 2008) includes a detailed rationale and outlines ten principles upon which the areas of learning are based.

Learning expectations for kindergarten are outlined in seven areas of learning:

- Early Literacy
- Early Numeracy
- Citizenship and Identity
- Environment and Community Awareness
- Personal and Social Responsibility
- Physical Skills and Well-being
- Creative Expression.

- Learner expectations in the early literacy, early numeracy, and citizenship and identity learning areas are the outcomes for Kindergarten in English language arts, mathematics and social studies in the Program of Studies: Elementary Schools.
- Learner expectations in the other four learning areas are integrated and focus on the early learnings in science, physical education, health and the fine arts.

As stated in the Kindergarten Program Statement:

"Young children learn in an integrated way, and many of the learnings identified in this program statement will be accomplished simultaneously. It is intended that the learner expectations will be integrated through learning activities that are developmentally appropriate for young children".

"The learner expectations of the Kindergarten Program Statement should be adapted and modified to meet the needs of each child".
