

Want to be part of the fourth industrial revolution?

Undergraduate and Graduate Training Opportunities in Bioinformatics and Genomics

for Students in Math/Computer and Life sciences

A circular inset image showing a close-up of a computer keyboard with keys that appear to be glowing with a blue light.

Genomics is rapidly evolving into a multi-billion research enterprise and industry. We are looking for talented undergraduate and graduate students with an enthusiastic interest in this field to join the research group of Dr. Athan Zovoilis. Dr Zovoilis (MD, PhD) recently joined ARRTI from Harvard Medical School (US) and holds a Canada Research Chair in RNA Bioinformatics and Genomics. Successful applicants from math/computer and life sciences will join a highly interdisciplinary and stimulating research environment working on computational or wet lab projects at the cutting edge of genomics & biologically inspired software engineering.
