

Potential Placement Sites/Agencies for Fall 2024 (September - December)

The below information on potential sites for TR placement is NOT an exhaustive list. Students are welcome and highly encouraged to do research into other potential agencies they would be interested in being placed with. The more proactive students are, the more likely they are to secure placement. If you apply to an agency on your own that is not listed within this document, please inform the Internship Specialist (marina.christman@uleth.ca) so we can ensure the agency and supervisor meets the required qualifications and we can work on an affiliation agreement. If you apply to an organization that is listed within this document but doesn't require Marina's involvement with the application process, please make sure to still let Marina know you have applied so we have the relevant information pertinent to you and this process.

Instructions/How to read this information:

- For **Alberta based, non-AHS sites** listed here, please follow their specific instructions/application process as indicated.
 - For **AHS sites** (indicated by **AHS**) students' applications are submitted via HSPnet by the Internship Specialist (Marina Christman)
 - Students **MUST** fill out the HSPnet Consent before applications will be submitted. This consent form is available on the TR practicum website.
 - You will notice that the name of the recreation therapist at each AHS site is not provided to you. This is intentional because students are NOT to contact them. You can address your cover letter and resume to the destination coordinators name, as indicated.
 - AHS allows students to apply to up to 3 sites in the first round of applications. **The due date for the first round of applications to AHS is April 26th, 2024 at 12:00pm.**
 - Email the Internship Specialist (Marina Christman) with your application,
 - Be very clear in the email which site(s) you want to apply for
 - Each application must be consolidated into 1 PDF file (cover letter and resume together in the one file). If you want to apply to 3 AHS sites, you will need to send 3 application files.
 - As the various AHS sites accept or decline applications, students will be given the opportunity to submit additional applications as relevant and as long as there are not ever more than 3 applications in process.
Marina will let students know via email when this is an option. Students CANNOT submit additional applications or ask to change their applications once the applications are in process. As such, make sure your initial applications are sites you are in fact interested in doing your internship at.
 - Larger organizations like NSHA, VCH, etc., have their own application process, be sure to do your research into how the larger organizations accept applications. The processes in place for larger organization are often, but not always, similar to AHS processes.
-

Non- AHS sites in Alberta (private agencies)

AgeCare SkyPointe, Calgary, Alberta

Description: AgeCare SkyPointe is a unique community that offers high quality, compassionate, resident-centered care in a culturally rich and diverse environment. With the capacity of 352 funded beds, the building is nestled in one of the most multi-cultural areas of Calgary. SkyPointe provides a home-like environment that will reflect the cultural preferences and tastes of its residents, including recreation and leisure programming.

At SkyPointe the recreation team supports residents from multiple care programs creating a vibrant, inclusive atmosphere for all to enjoy. The different care streams that are offered at AgeCare SkyPointe are: Long Term Care, Supportive Living Level 4, Support Living Level 4 Dementia Care (Secured), Long Term Care Mental Health (Non-Secured and Secured, 18 years old +), and Hospice Care.

- **Student Position(s):** Monday to Friday, 8:00 am to 4:30 pm [with flexibility for evenings and weekends to support special events and programs]
- **Dress Code:** Business Casual and as appropriate for assigned duties and tasks

SkyPointe is in the process of commissioning a seconded building, SkyPointe II that is dedicated to mental health. A unique opportunity to see how a facility is started, how it affects residents and an opportunity for research and development.

Application Process: All Student cover letters and resumes can be directly emailed to Marlee Dukart, CTRS, Recreation Therapy Manager, mdukart@agecare.ca

Carewest-Fanning Centre (with the potential time also spent at Garrison Green), Calgary, Alberta – with Charlotte Jordan, CTRS

Currently, Charlotte is in a temporary position on the neuro-rehab team at the Carewest-Fanning Centre. Her position at this site goes until at least the middle of November and may be extended further. If the position does end around the middle of November, the student would move with Charlotte to her permanent position at Carewest-Garrison Green with the EQUAL program for approximately the last month of the internship. As such, students who are interested in applying for this placement should be willing and interested in both potential settings and be flexible and confident in their skills to navigate this, while at the same time, being comfortable with potentially only staying at the one site. Additionally, be sure to look into both sites/settings so you have a good understanding of the placement. Charlotte has supervised many of our students and is willing to work with the university on supporting a student despite this change in her position that may be taking place. Carewest follows AHS immunization standards.

Students' applications are submitted via HSPnet (address cover letter to Charlotte Jordan, CTRS). Combine your cover letter and resume into one pdf file and send this to Marina to submit on your behalf.

Carewest-Garrison Green, Calgary, Alberta – with Rachelle Forster, CTRS

Description: Carewest Garrison Green is a long-term care facility that is located in the SW area of Calgary. We have two separate programs one is for people under the age of 65 and the other is complex continuing care for older adults. I primarily work on the two units for the complex continuing care program. One unit is for older adults and the other unit is for people with Dementia. The facility has a large recreation therapy department including 2 CTRS, 3 therapy aides and one activity convenor. Placement hours could be 0845 – 1700. Carewest follow's AHS immunization standards.

Students' applications are submitted via HSPnet (address cover letter to Rachelle Forster, CTRS). Combine your cover letter and resume into one pdf file and send this to Marina to submit on your behalf.

Bethany Care Society

Bethany Care Society has a few different sites located throughout the province. In the past there have been a few CTRS's who have taken our students, particularly in Calgary and Red Deer. We can't confirm if they have capacity, but they are open to receiving applications for internships. The two sites where students have completed placements in the past was at Bethany Mikkelsen House in Calgary and Bethany Collegese in Red Deer.

The organization's description: We currently have 10 Recreation Therapists across the long term care sites, including work with specialized programs – Young Adults, Alternative Level of Care, Complex Dementia Care. The recreation therapists are expected to complete initial and quarterly assessments, program plan/treatment plan/care plan, community outings, leisure education for staff/residents/families, integrate the sensory framework into practice, collaborate with other disciplines for pilot projects and to ensure high quality of care.

Requirements: vaccinations (including flu shot and covid 19), criminal record check, sign confidentiality agreement, follow dress code, first aid/cpr for outings.

Asset would be if the student has any certifications (i.e., dementia training, exercise training certifications, etc

**This is a pet friendly organization, and the organization would need to know about any allergies. A few sites have a cafeteria for lunch, but most likely bring own meals or go out to buy.*

Application process: All student applications go through Marina to Bethany's placement office. Successful candidates request will go through HSPnet.

Brenda Strafford Foundation – Bow View Manor, Calgary, Alberta

Description: The Bow View Adult Day Program provides respite to caregivers and gives seniors living in the community an opportunity to socialize in an accepting environment. Through recreation and education, participants maintain skills and develop new interests. The Adult Day Program has two different programs within it; Wellness based program and a Dementia based program where clients participate in a variety of activities to increase socialization, there is regular balance, strengthening and seated exercise programs and the program also offers healthcare monitoring and education for clients.

Application process: Students can apply directly to Kara DeClark, CTRS, Adult Day Program Manager Kara.DeClark@thebsf.ca.

Covenant Health

St. Josephs Auxiliary Hospital - Adult Day Program (ADP), Edmonton

Description: The Community Day support program serves clients through our medical rehabilitation program. We serve adults with physical, emotional, and/or social limitations that are living in the community. Our services include nursing assessment/ monitoring and rehabilitation (physiotherapy, occupational therapy and recreation therapy). The main goal for our day program is to assist clients to continue living independently in their homes and community, while delaying placement to another home.

Students' applications are submitted via HSPnet (address your cover letter to: "St. Joseph Recreation Therapy Student Preceptor"). **Covenant will only accept 3 student applications for consideration, if more than three applicants, randomized selection will occur.** Combine your cover letter and resume into one pdf file and send this to Marina before April 26, 2024 to submit on your behalf via HSPnet.

- BLS & N95 Mask Fit Test required
-

St. Thomas Health Centre, Edmonton

Description: Saint-Thomas Health Center was built by the francophone community of Edmonton in response to the needs of its aging French speaking population. It is unique in that it was built to provide aging-in-place (Supportive Living SL4 & Dementia) services in both French and English.

Supportive Living Level 4 offering assistance to older adults who are unable to live independently at home. The site uses a collaborative approach towards assisting residents while remaining family and resident-centred. The site promotes independence and encourages creativity amongst team members to maintain residents' autonomy, respect, privacy, dignity, and access to information.

Students' applications are submitted via HSPnet (address your cover letter to: "St. Joseph Recreation Therapy Student Preceptor"). **Covenant will only accept 3 student applications for**

consideration, if more than three applicants, randomized selection will occur. Combine your cover letter and resume into one pdf file and send this to Marina before April 26, 2024 to submit on your behalf via HSPnet.

- BLS & N95 Mask Fit Test required

AHS Calgary Zone

Foothills Medical Centre – Unit 21 Psychiatry

Description: Foothills Medical Centre (FMC) has two general psychiatry adult inpatient units (21 and 22) with 30 beds on one unit and 26 on the other. FMC provides acute care and stabilization for adults between 18-65 years old with serious and ongoing mental health concerns. Services offered include assessment, treatment, individual and group therapies, and discharge planning to support community reintegration. The interdisciplinary team includes psychiatrists, nurses, social workers, pharmacists, occupational therapists, and a recreation therapist. The student would work Monday to Friday 0800-1615h alongside the recreation therapist. Trauma-Informed Care principles, NVCI training, and BLS certification would be helpful and beneficial to student placement.

Student Activities

- Recommend:
 - Trauma-Informed Care principles,
 - NVCI training, and
 - BLS certification
- Connect Care

Destination Coordinator: Jane Papenhuyzen

Foothills Medical Centre – Unit 58 Neurology Rehabilitation

~~Requires knowledge of anatomy, physiology, and neurological diagnoses.~~

~~Requires experience/background in hospital settings.~~

~~Student Activities:~~

- ~~• BLS required~~
- ~~• Mask Fit Testing (N95)~~
- ~~• Connect Care~~

Destination Coordinator: Jane Papenhuyzen

Summit Centre for Youth Resilience – West Hillhurst NW Calgary

Description: The Day Hospital program at the Summit Centre for Youth Resilience provides step down support to clients that have been discharged from an inpatient mental health program. Programming consists of a daily structured milieu including school and therapeutic activities. Therapies are both conversational and activity based. The hours of operation for the Day Hospital are Monday to Friday (8am-8pm) and Saturday/Sunday (9am-5pm). There are two Recreation Therapist that support the program 7 days a week. Students will be scheduled for evening and weekend shifts in order to gain experience working with both youth and their families. Students will be scheduled for evening and weekend shifts in order to gain experience working with both youth and their families.

Student Activities

- BLS required.
- Non-Violent Crisis Intervention recommended.
- Brain Story Certification is an asset: <https://www.albertafamilywellness.org/training-2>
- Connect Care

Destination Coordinator: Jane Papenhuyzen

Peter Lougheed – Community Accessible Rehabilitation

Description: Outpatient rehabilitation adult (18+) services to people in Calgary and neighbouring areas. Supporting the needs of individuals with ongoing chronic and/or complex conditions or injuries.

Treatment is time-limited. Primary clinical populations for recreation therapy: neurological conditions (stroke, brain injury, Parkinson's disease, multiple sclerosis), frail elderly, musculoskeletal & rheumatological conditions. Highly interdisciplinary and complex. The student would need to be very independent, reliable, collaborative and have a good background in neuro diagnoses and chronic conditions. Treatments are typically 1:1. There would be limited to no group experience.

Student Activities:

- BLS required
- Connect Care
- Some client app'ts in community, can use personal vehicle or transit.

Destination Coordinator: Jane Papenhuyzen

Peter Lougheed – Unit 27 Mental Health

Description: Placement occurs over 2 units. Inpatient Psychiatry U27 at Peter Lougheed Centre (PLC) is a 31-bed unit that serve adults 18 years of age and older that suffer from an acute psychiatric disorder and require admission to an acute care facility. Patients are provided with comprehensive multidisciplinary programs and specialized services. U130 Stabilization at Peter Lougheed Centre (PLC) is a 22-bed unit for patients who have the potential to be cared for at a lower level of care within 72 hours. It is a program for short term stabilization and reconnection with community resources. Student Activities:

- BLS required
- Connect Care

Destination Coordinator: Jane Papenhuyzen

Rockyview General Hospital – Unit 45

Description: Inpatient Psychiatry Unit 45 at Rockyview General Hospital (RGH) is a 20-bed unit that provides acute care for adults between 18 to 65 years of age with a principal psychiatric disorder. Patients are provided with comprehensive multidisciplinary care through nursing, medical staff, psychology, social work, and occupational/recreational therapy. Mental health needs are assessed through a variety of individual and group activities by various disciplines such as occupational therapy, recreational therapy, and Changeways (a psycho-educational program).

Highly transdisciplinary role more suited for a student specifically interested in Addiction & Mental Health and comes with experience in Addiction & Mental Health.

Student is strongly grounded in recreation therapy role so they more confidently work within a team with blurred interprofessional roles.

CAAMHP – Youth Substance Use & MH Services

Description: YSUMHS Substance Use Programs:

Recreation therapist is split between 4 programs at 2 different sites in Calgary (one north and one south) all serving youth ages 12-18 accessing various levels of support with substance use and mental health services through YSUMHS. COT – is a community outpatient clinic. Services include psychiatry, psychology, individual counseling, family counseling, recreation therapy, parenting support groups, and DBT group. The role of recreation therapy is focused on helping clients with personal goals in exploring healthy leisure and connecting to same in the community. Knowledge of community resources that service youth is a big part of this role and being comfortable reaching out to community partners. RSD – is a 14-day voluntary live-in detox program with 4 beds. Services include support from childcare counselors, recreation therapy, and individual counseling. The role of recreation therapy is in providing leisure education groups 1x per week. PChAD – is a 10-day court-ordered secure site live-in detox program with 9 beds. Services include support from childcare counselors, recreation therapy, individual counseling, and nursing. The role of recreation therapy is in providing leisure education groups 1x per week. Hours on this day are 9:15-5:30pm on Tuesdays. YRP – is a 12-week voluntary live-in recovery program. Services include school, recreation therapy, family counseling, individual counseling, support from childcare counselors, nursing, and psychiatry as needed. The role of recreation therapy is in providing leisure education groups/outings 1x per week as well as supporting in discharge planning and sober leisure goals identified on intake.

Adolescent Day Treatment Program:

ADTP is a 12-week day treatment program for adolescents ages 13-18 who are experiencing mental health and/or substance misuse issues. It is a specialized mental health program that operates from a family centered perspective and includes daily programming of therapeutic groups, individual and family therapy, and classroom instruction provided by Calgary Board of Education. The hours of operation are M-F 0800-415. Students will be required to attend recreation therapy sessions out in the community and need to be familiar with transit and having their own vehicle is preferred. There is some street parking available and it is located by a train station. Students may be scheduled outside of client hours to support groups occasionally.

Student Activities:

- Connect Care
- BLS certification
- Appropriate attire/gear for outdoor activities
- Unusual shifts is a possibility on occasion
- Vehicle requirement for independent travel in community preferred due to multiple sites and community work.
- Non-Violent Crisis Intervention (NVCI) is recommended but not required.
- Brain Story Certification is an asset. <https://www.albertafamilywellness.org/training-2>
- At times this can be quite heavy emotionally. Ability to manage stress well and good boundaries are important.

Destination Coordinator: Jane Papenhuyzen

Complex Mental Health Rehab Program

Description: This is a new program that recently opened in January 2023. The program has 32 beds on two floors (16 each). Residents can participate in rehab and live at this facility for up to 2 years. Recreation therapy programming is focused on recreation participation groups (open art & fitness), assessment, leisure education, and community integration.

Population: adults 18+ who are experiencing a mental health diagnosis and potentially substance use disorder.

Complexities: This is a voluntary program therefore residents can refuse treatment, discharge early from the program, and participation is often impacted due to the nature of a harm reduction approach.

Expectations: Be prepared to develop various evidence-based protocols for this population, implementing and evaluating each group, and grant skill development.

Knowledge and Skills: foundational understanding of Schizophrenia, Schizoaffective disorder, Bipolar 1 & 2, Borderline Personality Disorder, Anxiety, Depression, Psychosis, and OCD.

Student Activities:

- Connect Care
- N95 Fit Test Mask
- BLS Certification
- Vehicle requirement for independent travel in community
- Non-Violent Crisis Intervention
- Soft skills: flexibility/adaptability, empathy, compassion, able to collaborate and build relationships quickly, maintain professional boundaries, be open to feedback, and able to work well in an interdisciplinary environment.

Destination Coordinator: Jane Papenhuyzen

Claresholm General Hospital

Description: The Claresholm Centre for Mental Health & Addictions is a 108-bed facility treating adult patients with a variety of mental health and addiction needs. There are four primary inpatient units at the site including Concurrent Disorders (28 beds), Active Psychiatric Rehabilitation (40 beds), Extended Psychiatric Rehabilitation and Transitions Unit (40 beds). The facility also includes a gym, swimming pool, vocational rehab program that includes horticulture, woodworking, computer skills, car detailing, ect.

The primary placement will be on the extended psychiatric rehabilitation and transitions unit treating patients with severe psychiatric illness accompanied by dysfunction in the community. There will be opportunities to have experiences within the active psychiatric rehab unit working with adults experiencing chronic mental health issues and disorders participating in

rehabilitative activities and treatments. Student may also have opportunities to experience treatment within the concurrent disorders program that emphasizes applying recovery skills, preventing relapse, improving emotional functioning, and promoting personal responsibility. The student will have an opportunity to work as part of a transdisciplinary team consisting of psychiatrists, psychologists, social workers, pharmacists, nursing, vocational rehabilitation workers.

A successful student candidate must be capable of practicing evidence based, patient-and family-centered care, in accordance with policies, procedures and standards of practice. They should understand mental health disorders, concurrent disorders, and a desire to work with these patients. They must have a good understanding of the Therapeutic Recreation Process. Student will be required to complete assessment, treatment, education and management of clients' treatment progress and provide clinical support and consultation. Must be able to collaborate and communicate with the health care team and participate in and facilitate groups and one-to-one activities with your clients.

Centennial Centre for Mental Health & Brain Injury – Bryce House

Description: Concurrent Disorders Enhanced Services (CDES), Centennial Centre: A 22 day voluntary inpatient program for individuals who have severe mental illness and a co-existing addiction. The unit currently consists of 20 beds with two streams (higher functioning and lower functioning). As a CTRS student you will gain knowledge and experience using the APIE (Assessment, Plan, Implement and Evaluate) process. This includes conducting intake assessments on each patient admitted, assisting patients to meet leisure goals identified during intake throughout admission, implementing psychoeducational/skills based RecT programs, continuous documentation/evaluation and connecting each patient with leisure resources upon discharge. There is a strict schedule of daily mandatory programs that include: leisure education, experiential learning, stress management, healthy coping, healthy living, and life skills. CCMHBI also contains a gymnasium, swimming pool and Activity Treatment Centre which CDES utilizes on a regular basis. This is a fast paced program that involves ++ client interaction and interdisciplinary collaboration. Aside from the CTRS, you will work close with a Therapy Assistant, Psychiatric aides, Addictions Counsellors, Psychiatric nurses, Psychologist and Psychiatrist.

Destination Coordinator: Annette Yunick

Lethbridge Chinook Regional Hospital Unit 5A/5B

Description: Acute Care- 5A Geriatric Assessment Rehabilitation Unit (25 beds) and 5B Sub-Acute Care Unit (20 beds)

Chinook Regional Hospital Unit 5A is a Geriatric Assessment Rehabilitation Unit and Unit 5B is a sub-acute short stay unit providing medical and rehabilitation services primarily to older adults requiring support after a change in their health or physical/cognitive function. Working within a strong inter-professional team, the student will experience therapeutic recreation assessments, therapy planning, implementation of evidence-based therapies and supervision and providing assignments to therapy assistants. A strong emphasis is placed on supporting patients to transition home or to a new facility based living environment. The student would need to be very independent, reliable, and collaborative and have a good background in a variety of chronic and acute diagnoses. Students must be open to feedback and mentorship from the various disciplines in which TR collaborates with daily. Students must have strong skills in handwritten documentation to communicate concisely to the team about TR services provided to the patient.

Student Activities:

- BLS required
- Knowledge and skills required for supported exercise and aquatics
- Fitness Alberta certification preferred
- Membership with provincial TR association or CTRA
- Strong self-management skills and ability to adapt to a busy and demanding work environment
- Connect Care

Destination Coordinator: Annette Yunick

Medicine Hat Community Health Services

Description: The Community TR program provides therapeutic recreation services for 18+ year old adults for home care and non-home care individuals living in the community. The recreation therapist is accountable for assessments, individual, group and virtual care interventions, electronic documentation in Connect Care, evaluation of client's progress, and supervising and providing assignments to therapy assistants. Building community partnerships is also part of the recreation therapist responsibilities. Appointments are conducted in a variety of community venues, supportive living and in the client's home. Collaborating with PT for Aquatic Therapy in the community. Other informed evidence therapy offered includes but not limited to Expressive Arts, Tiered Exercise Program, Walking to Wellness, Opening Minds through Art, Leisure Education, Gentle and Seated Yoga, Therapeutic Writing, Visual Journaling, Music Care, Rhythm Circle Drumming, and Fit Minds®. ONTARIO

William Osler Health System

Brampton and the western Toronto district of Etobicoke - Ontario

Students to email Chris directly at chris.richard@williamoslerhs.ca (address cover letter to Chris). Up to a potential of 5 student placements may be available (competitive with other University students).

William Osler Health System has hospital campuses located in Brampton and Etobicoke Ontario. Clinical areas available to internship students include mental health, rehabilitation, and reactivation care unit. More details on these various areas and about doing an internship with William Osler Health System are available. Please contact Marina Christman or Aimee Douziech if you are interested in doing a placement here and more information can be made available to you.

Students who are interested in an internship at William Osler Health System will need to participate in a submission and selection process. Submission must include the following items:

1. Completed application form (ask Marina for this)
2. Resume/curriculum vitae
3. Cover letter describing why you want to be a recreation therapist
4. Two letters of reference: One academic and one personal

Application Deadlines: Fall Semester – May 31, Spring Semester – September 30

Other Ontario internship sites/supervisors: A few students have completed their placement in Ontario -- If you are looking for other potential sites/supervisors in Ontario, please reach out to Marina who can provide some insight on sites we currently have affiliation agreements with.

NEWFOUNDLAND

Newfoundland and Labrador Health Services (prev. Eastern Health) – Throughout Newfoundland

Multiple CTRS's, range of placements

Please indicate to Aimee and Marina if you are interested in Eastern Health for placement. Students asked not to reach out directly. Deadline to express interest and submit resume for consideration by Eastern Health is May 14th for Fall 2024. **Please note the agreement is in process of being renewed.**

Central Health – Throughout Newfoundland

Please reach out to Student.Services@centralhealth.nl.ca to inquire into potential placement opportunities.

The Residence at Littledale, St. John's, Newfoundland

Description: This is a residential care facility based on a hybrid model. The facility has independent living, assisted living, dementia care, respite care and palliative care. Some of the programs and interventions facilitated include exercise / dance and movement / chair yoga, nature walks, music groups, social teas, arts and crafts, sensory stimulation, community outings, social games, horticulture, pottery, etc. The recreation therapist is currently in the process of re-structuring programming to align with the flourishing through leisure model. Students interested in completing their internship at this location should be familiar with the culture change movement, person centred care, and relational care.

Application Process: All Student cover letters and resumes can be directly emailed to Silvo Hernesniemi, CTRS, Recreation Therapist: shernesniemi@littledale.ca

Nova Scotia Health Authority (NSHA)

Application Deadlines for Placement is May 1 for Fall Placement, August 1 for Winter Placement

For details, please see their webpage:

<https://cdhaforms.nshealth.ca/rectherapyinternshipapplication.aspx>

British Columbia

Vancouver Island Health Authority, Vancouver Coastal Health, and Fraser Health

Please indicate to Aimee and Marina if you are interested in a placement within any one of these health zones. Please be aware that students who reside in the area or who are interested in relocating to the area following their internship are the priority for placement with these BC health authorities. Students asked not to reach out directly. [HSPnet Request](#) - deadline to submit applications is at least 8 weeks prior to intended semester.

Interior Health

Please indicate to Aimee and Marina if you are interested in a placement within Interior Health. Students asked not to reach out directly. [HSPnet Request](#) - deadline to submit applications is at least 8 weeks prior to intended semester.

Tamarac Cottage in Cranbrook BC (with Interior Health)

Description: Tamarack Cottage is an 8 bed adult mental health/substance-use tertiary care facility for clients requiring longer-term residential psychosocial rehabilitation. Our interdisciplinary team consists of Life Skills Workers, LPNs, Social Work, Recreation Therapy, and 1 RN. Treatment is also coordinated with community mental health teams. We strive to support our clients in improving overall quality of life, by assisting them in developing the skills and resources to live as well, active, and independently as possible. Some recreation therapy programs currently offered at Tamarack Cottage include morning movement, physical activity, creative writing, community engagement, and coffee house. These programs are ran regularly throughout the week, supplementary to 1:1 programs developed specifically to address unique client goals. The recreation therapist position is a 0.8 FTE, so please be prepared to spend some time shadowing other disciplines to meet internship hour requirements.”

Application Process: Send application to Marina for entry into HSPnet.

Cowichan Brain Injury Society

Please see this website for details: [Programs - Cowichan Brain Injury Society](#)
