

Lethbridge Number Theory and Combinatorics Seminar

Monday — October 21, 2013

Room: B660

Time: 12:00 to 12:50 p.m.

Adam Felix
(University of Lethbridge)

On the distribution of torsion points modulo primes

Abstract: We will discuss a paper of Chen and Kuan, in which they study the distribution of torsion points modulo primes over several different commutative algebraic groups. They demonstrate that the average is related to some generalized divisor function for these groups.

EVERYONE IS WELCOME!
