

Psychology 2505A – Abnormal Psychology
Fall 2013
Monday, Wednesday, Friday; 10:00 to 10:50 a.m.
in PE261

Instructor	Contact Info	Office Hours
Dr. Stephanie Hancock Psychology Department University of Lethbridge	Office: University Hall, D854 Email: stephanie.hancock@uleth.ca Phone: (403) 394-3930	By appointment (email to schedule a mutually convenient time)

Course Teaching Assistant: Jessica Parker; email: jessica.parker@uleth.ca

Please contact the course teaching assistant for clarification on course material and for an opportunity to review graded exams. If any questions remain, please contact the course instructor. I am happy to discuss any unresolved questions or concerns.

Course Description

Abnormal Psychology examines the realm of abnormal behaviour and experiences, their causes and developmental courses, and their treatments. The past decade is marked by a blossoming of research on the entire range of psychological disorders, yielding tremendous insight and, most recently, publication of a new *Diagnostic and Statistical Manual of Mental Disorders* (the DSM-5). In this course, we will investigate: historical perspectives on abnormality; the wide range of psychopathologies currently included in the DSM; research methods used to study mental illness; and the major theoretical perspectives that attempt to understand and explain abnormality.

* *Prerequisite: Psychology 1000*

Required Text

There is no assigned textbook for this course, rather all required readings and materials will be made available through Moodle. Those materials marked with an asterisk (*) are required readings, and knowledge of their content will be tested on exams. Those materials that are unmarked are for students' interest and, while applicable and intriguing, you will not be formally examined on their content.

Outline of Course Topics

Details regarding the coverage of course material throughout the semester and for exams will be provided in class and/or posted in Moodle. Students are *strongly* encouraged to access the course Moodle site *multiple* times per week as important materials and announcements will be posted regularly throughout the semester. It is your responsibility to keep up to date. Class lectures will be structured for a more focused study of specific areas of interest and their content is essential to successful course completion.

Copyright, Moodle, and Intellectual Property

With the exception of information that is freely available on the internet, all course materials should be treated as copyright-protected. You are free to download and/or print a *single* copy of any materials posted for your use within Moodle, and you are free to take your own notes in class (of course!). You are *not* permitted to distribute materials or information in any form to persons not registered in this course in this semester. Once the information is in your hands, you are responsible for what you do with it; your professor will not be held responsible for students who choose to violate the law. The Students' Union maintains a Note Bank for students to turn in their class notes at the end of semester. Stop and think before you turn in your "notes". You are legally responsible for what you submit. Audio or video recording of lectures or any other in-class presentation or activity is *strictly prohibited*. Doing so violates intellectual property rights and the privacy of your classmates who have not consented to have their voice/questions recorded.

Grade Assessment

Your overall grade in the course will be determined by the following:

- Three term exams, in total worth 90%
 - Exams may consist of a combination of questions testing recognition (e.g., multiple choice, true-false, &/or matching questions) and recall (e.g., fill-in-the-blank, listing, &/or labeling questions). Details regarding the exact format of exams will be made available through Moodle. The exams are *non-cumulative* and will cover material from class lectures, class activities and discussion, videos, and any additional required readings and resources.
 - The tentative schedule for exams is as follows:
 - ✓ **Exam 1:** worth 30% of overall grade
 - opens Friday, October 4, 10:00 a.m.; closes Sunday, October 6, 5:00 p.m.
 - ❖ No class will be held on Friday, October 4, in order to allow students time to write the exam during scheduled class time, if you so choose.
 - ✓ **Exam 2:** worth 30% of overall grade
 - opens Friday, November 8, 10:00 a.m.; closes Tuesday, November 12, 10:00 p.m.
 - ❖ No class will be held on Friday, November 8, in order to allow students time to write the exam during scheduled class time, if you so choose.
 - ✓ **Exam 3:** worth 30% of overall grade + worth of lost *in-class group work, collaborative learning sessions, and assigned homework and readings* grades
 - opens Monday, December 9, 10:00 a.m.; closes Friday, December 13, 5:00 p.m. (during the final exam period).
- In-class group work, collaborative learning sessions, and assigned homework and readings: 10%
 - Students often don't know what they don't know until asked to apply the course concepts. In-class group activities and assigned-reading quizzes give you an opportunity to self-evaluate and discover what you know and don't know to help you better prepare for exams.

NB: The weighting of exams will not be changed under any circumstances.

Exam Procedures

Exams will be closed-book, written out of class at the University of Lethbridge Testing Centre, using the online Moodle testing utility (<https://moodle.uleth.ca>). Your Moodle username is equivalent to your U of L email username (the part of your email address that comes before "@uleth.ca") and your Moodle password is your email password. Should you require assistance with Moodle or your account, please contact the Teaching Centre staff (email: teachingcentre@uleth.ca).

Students should familiarize themselves with Testing Centre procedures and hours of operation before arriving to write the exam (see: <http://www.uleth.ca/teachingcentre/testing-centre>). Access is granted on a first-come, first-served basis. Once you enter the facility, you will be required to present valid picture ID (either your student card or a valid driver's license) and to fill out a brief form that registers your exam. All students must submit their exam by the closing date and time of the testing centre. Please allow yourself adequate time to complete your exam. It is strongly recommended that students write the exam as early as possible during the scheduled exam time because seating in the Testing Centre is limited and demand for seats is high.

Grade Ranges

The following ranges will be employed in assigning grades in this course:

A+ > 90	B+ 77 - 79.99	C+ 67 - 69.99	D+ 55 - 59.99
A 85 - 89.99	B 73 - 76.99	C 63 - 66.99	D 50 - 54.99
A- 80 - 84.99	B- 70 - 72.99	C- 60 - 62.99	F < 50

Missed Exam / Missed Class Activity Policy

If a student is unable to write an exam during the assigned exam period, please contact the course instructor as soon as possible. Medical reasons must be supported by a physician's statement that test performance would be seriously affected by the illness, along with the physician's name and contact information. Non-medical reasons must also be supported. It is the student's responsibility to contact the instructor to set up a make-up exam. Unless a medical note, documentation of bereavement, or other acceptable documentation is presented, a grade of 0% will be assigned for any exam not written at the designated time.

All students enter this course with a grade of 0%. You *earn* your grades. Should you be absent from class on a day during which group-work grades are earned, those grades cannot simply be dismissed or ignored in the final tabulation of your course grade. Instead, to give you an additional opportunity to earn those missed grades, their worth will be added to the worth of your third exam. As an example scenario, if you earn 8% out of 10% on in-class group work, collaborative learning sessions, and assigned homework and readings, the remaining unearned 2% will be added to the worth of exam 3, so that it becomes worth 32% of your overall grade in the course. No documentation to support your absence from class is required for this adjustment.

Students with Special Needs

If you are a student with a disability and need help with your classes, you may receive help by contacting the Disabilities Resource Centre (<http://www.uleth.ca/ross/disabilities/index.html>).

Experimental Research Participation and Bonus Marks

Students have an opportunity to add bonus points (up to 2%) to your overall grade in this course by participating in active research programs of Psychology faculty members. This participation allows you to gain personal experience in psychology research projects, provides an opportunity for you to see what goes on in the psychology labs, and helps you to meet senior undergraduate and graduate students conducting their own laboratory research projects.

The available studies will be listed and described on the Sona System at: <http://psychleth.sona-systems.com>. Your username will be the same one you use to access Moodle. A password (which will *not* be your Moodle password) will be emailed to you at your U of L account by the departmental Administrative Assistant early in the semester once the online system is ready. Calls for volunteers to assist in these projects will be made throughout the semester, via an e-mail from the departmental Administrative Assistant. If you are asked to volunteer, and you accept, each project usually requires one hour or less of your time, but this will depend on the individual research project. In recognition of your time, and in recognition that you are learning something about the discipline of psychology beyond what you acquire in the classroom setting, an extra credit of 1% for each study in which you participate will be added to your total grade in the course (so, it is theoretically possible to score 102% in this course).

Note that there is no guarantee that all students who wish to participate will be able to achieve the maximum extra credit. As these are extra credits, students who choose not to participate are not disadvantaged. There will be *no* transfer of credits between courses. If you are registered in another Psychology course that offers credits, a second email will be sent to you with a different password. Sign up in the course to which you would like to have your credits assigned. Because research studies start up at various points throughout the semester, additional projects that were not originally listed may show up, so be sure to check the system periodically. The last date to participate in research studies is December 6, 2013. If you experience problems with the Sona System, or have questions about participating, please contact Leanne at wehlage@uleth.ca.

University, Classroom, and Teaching Policies

- ❖ *Everyone is entitled to their own opinion, but not their own facts* (Sociologist and U.S. Senator, Daniel Moynihan). Given the nature of the course material, a diversity of viewpoints will inevitably exist in the classroom. Voicing well-reasoned disagreement with others' viewpoints is perfectly fine; being combative, intolerant, or disrespectful towards others is not (see the University Calendar Section 5.b.1). Open-mindedness is a prerequisite for learning.

- ❖ As per the University Calendar, Section 5.h.1.: "*When a student disrupts instructional activities, the instructor may exclude the student immediately from instructional space and/or from future scheduled instructional meetings of that course pending further actions by the Dean.*"
When students talk &/or giggle amongst themselves during lectures, it disrupts instructional activities and, consequently, I will respond according to the University Calendar regulation. To minimize other forms of disruption, turn off your cell phone or any other noise-emitting device prior to the beginning of class. Avoid engaging in off-task internet use (e.g., Facebook, Google, Texting) during lectures as it distracts you and others around you.
- ❖ Students are responsible for familiarizing themselves with the Academic Regulations and Policies contained within the University of Lethbridge Academic Calendar (<http://www.uleth.ca/ross/sites/ross/files/imported/academic-calendar/2013-14/part04.pdf>).
- ❖ In all email messages addressed to the instructor or teaching assistant, include the *course name* and *topic* of your email in the Subject line. Address the recipient appropriately (e.g., "Hi Dr. H. ..." or "Dear Jessica..."), and end the email by typing *your full name*. This makes sending accurate replies and keeping track of correspondences much easier!
*** If you fail to structure your email correspondence by these guidelines, or if you email the instructor or teaching assistant with a question that has been answered on Moodle or in this course outline, do not expect a reply.***
- ❖ Following exams, the teaching assistant will be available to meet with you, discuss your test results, and review the correct answers. Contact the teaching assistant directly for available meeting times.
- ❖ Instructor course notes will not be provided to students. Supplemental materials (including Flash Video files of course lectures *following* their presentation in class) will be posted in Moodle.
- ❖ I will not provide study guides or designate class time solely for the purpose of exam review.
- ❖ Additional work will not be assigned for those who wish to improve their course grade.
- ❖ If you miss a class video, it cannot be borrowed from the instructor and there will be no second screening.

Tips for success in PSYC 2505

- ❖ *Keep your chin up.* Research tells us that texting while driving increases one's risk of car accident to a degree roughly equivalent to that of driving drunk. Professors' experience tells us that texting during class increases students' risk of failing to a degree roughly equivalent to that of coming to class drunk. Increase your likelihood of success - don't do either, or send a designated note-taker on your behalf.
- ❖ *Understand that your professor is your ally, not your adversary.* As your professor, I want nothing more than for you to feel passionate about, engaged in, and enthralled by *Abnormal Psychology* as much as I am. I want you to learn, understand, and apply the material, to succeed and earn high grades in the course. I can help you achieve this goal, but I can't do it for you. Achieving success requires regular class attendance, showing up on time (i.e., *before* the lecture begins), staying until class has officially ended, paying full attention during lecture, participating in class activities, completing all assigned work, and checking Moodle frequently for valuable resources.
- ❖ *If in doubt, find out.* If you are unclear about any of the material presented in class or posted as assigned readings in Moodle, or if you have a question that has not been answered in any of the valuable course resources that have been provided to help you, then ASK! Your teaching assistant and professor are more than happy to address any pertinent questions you may have.

Enjoy a great semester!
