Bachelor of Arts

Psychology

Psychology delves into what makes people tick. Psychologists study the relationship between mind and behaviour by investigating the nature of thought processes and behaviours in humans and other animals. Psychologists also study the evolutionary, social and cultural factors affecting the development of our thoughts and behaviours, focusing on topics that have a direct bearing on our day-to-day experience. A major in Psychology will help you develop skills in analyzing and interpreting complex material, particularly as it relates to behaviour.
