Name: _____

Bachelor of Science

Remote Sensing

Remote sensing provides a new vantage point to marvel, monitor and measure our world. With the advent of Earth observation and satellite technology, we are now able to view the planet — and our impact upon it — in real-time digital imagery. As a remote sensing student, you will study geography, environmental science and physics, as well as other topics focused on the field. You will also learn to record and interpret images using highly-specialized instruments, some of which are unique to the B.Sc. in remote sensing at the University of Lethbridge.

What determines my program requirements?

Please refer to the Academic Calendar (www.ulethbridge.ca/ross/academic-calendar) for complete program information.

Calendar Year: 2024/2025 - Your calendar year is set to the academic year you are admitted (or readmitted) and you should follow the requirements for that year for the duration of your program.

Faculty/School: Faculty of Arts and Science (www.ulethbridge.ca/artsci)

Program(s): Bachelor of Science

Major(s): Remote Sensing

Minor: A defined set of courses, designed to provide depth in a particular discipline, study in an interdisciplinary area, or focus on a theme-related topic. To learn more about optional minors see www.ulethbridge.ca/ross/minors.

Am I admissible to this program?
