Geography

Geography deals with the diverse landscapes around us. The primary focus of the program is to give you the skills necessary to analyze the organization and interaction of all creatures and ecological processes on the planet — and sometimes beyond it — to address real-world issues. You'll have access to the latest hardware and software available in geography, economics, environment, agriculture, ecology, planning etc, as well as state-of-the-art facilities like the Alberta Water and Environmental Science Building.
