Political Science

Political science is the systematic study of government, politics and political behaviour. It looks at how political conflict is organized and resolved, how rulers are chosen, how governmental decisions are taken and what policies and laws are determined and implemented. This can be done looking at Canada as a whole, to our provincial and local governments, to other countries and the relations among countries. It also considers how political actors understand their obligations towards one another and the degree to which decisions are ethically determined or out of convenience.
